Experience

AI Engineer – FunAI (Functional AI Partners)

May 2026 – Present

- Lead delivery of **multiple production “Digital Staff” AI agents** for enterprise B2B clients (Singapore, Japan) — from client scoping to architecture, deployment, and operations
- Built product using LangGraph and FastAPI for course-generation platform, automating images and module-summary videos with MinIO storage and Creatomate/FFmpeg rendering
- Shipped a multi-agent **Japanese voice-AI** (ElevenLabs; 68-case test suite) and a face-detection & clustering pipeline (YOLO, InsightFace, HDBSCAN) on a **5 GB+** full-stack platform

AI Researcher – InsecLab (University Lab)

Feb 2025 – May 2026

- Published **2 IEEE papers** (1 first-author) on LLM- and multimodal-based smart contract vulnerability detection
- Designed structured prompt pipelines (agent-role chaining) and built scalable embedding/graph pipelines for benchmarking and ablation studies

AI Research Collaboration – Pi Labs AI (India Company)

Sep 2025 – Dec 2025

- Helped define scope and evaluation criteria of anomaly detection for telecom data in an industry collaboration
- Evaluated KAG frameworks and explored graph-based/multimodal approaches (CDR + voice/text) for fraud detection

Projects

Job Resume Matching System

Nov 2024 – Jan 2025

GitHub [🔗](#)

Tech: Python, FastAPI, MongoDB, React, LangChain, LLaMA 3, SentenceTransformers

- Built a full-stack RAG system with **custom similarity scoring for resume-job matching**
- Delivered more relevant recommendations with **<2s latency** on 400+ scraped job descriptions and 100+ real resumes

Modular Retrieval-Augmented Generation (RAG) System

Jan 2025 – May 2025

GitHub [🔗](#)

Tech: Python, FastAPI, MongoDB, LangChain, SentenceTransformers, Chroma

- Designed a modular RAG pipeline with **multiple query strategies**
- Improved retrieval quality by **22%** with p95 latency < 1.8s, evaluated on benchmark datasets (**MS MARCO, Cranfield**)

Publications

Prompt-Based Smart Contract Analysis [🔗](#)

Co-Author, IEEE MAPR 2025 Conference

Multimodal Approach for Smart Contract Security [🔗](#)

First Author, IEEE ISCIT 2025 Conference

Education

B.S. University of Information Technology (UIT), VNU-HCM

2022 – 2026

Major: Computer Science

Specialization: Artificial Intelligence and Information Security

Relevant Coursework: Artificial Intelligence, Machine Learning, Deep Learning, Data Mining, MLOps, AI Systems

Skills

Generative AI & LLMs: Multi-agent & agentic workflows, Voice AI (ElevenLabs), Prompt Engineering, LLM Evaluation

Full-Stack & Cloud: Next.js/React, TypeScript, FastAPI, Supabase/pgvector, n8n, Vercel/Railway, Firebase

MLOps & Production: Docker, CI/CD, prompt caching, streaming, monitoring (latency, cost), experiment tracking

Retrieval & Data: Hybrid Retrieval, Vector Search, RRF, BM25, SentenceTransformers, SQL, MongoDB

Languages: English (Upper-Intermediate B2 – Effective professional communication)
